

Save Money on High-Efficiency Equipment!

DTE Energy has partnered with food service equipment dealers to offer Instant Rebates at the point-of-sale to non-residential DTE customers for the purchase and installation of qualifying energy-efficient natural gas and electric food service equipment.

Qualifying Equipment

Many makes and models of natural gas and electric foodservice equipment qualify for rebates up to \$3,000 per unit. Eligible equipment must be installed at an active, valid, natural gas or electric DTE non-residential service location. For a full list of eligible equipment, select the corresponding equipment lists at www.energystar.gov/productfinder.

	Ultra-Low Temp Freezer	\$600 - \$1,200*

Fast & Convenient Process

As a DTE customer, you can skip the paperwork and receive a rebate directly on your invoice when you purchase qualified natural gas or electric foodservice equipment from participating dealers.

Earn Lifetime Savings with High-Efficiency

Energy-efficient equipment uses less energy and water, so you pay less on your utility bills without sacrificing performance. Major cooking appliances account for almost 35 percent of the average restaurant's energy expenditures. Energy-efficient equipment can decrease these energy costs by as much as 75 percent.²

^{*}Rebate amounts and potential savings vary based on size and capacity of equipment

¹Customers purchasing Demand Controlled Kitchen Ventilation may receive the gas rebate if they have a non-residential gas DTE account or the electric rebate if they have a non-residential DTE electric account. Customers can receive both rebates if they have non-residential gas and electric DTE accounts.

²Energy consumption for commercial kitchens based on ENERGY STAR® study: energystar.gov/ia/business/small_business/restaurants_guide.pdf.
