Instant Rebates

Need new equipment? Get up to \$3,000 off energy-efficient models, instantly. The Point-of-Sale Food Service Rebate Program makes high-efficiency models more affordable than ever—so you can enjoy great performance, lifetime energy bill savings, and the satisfaction of making the cleaner, healthier choice for your kitchen and community.

Instant Rebates up to \$3,000 per unit

DTE customers that purchase and install qualifying high efficiency natural gas or electric food service equipment may be eligible for discounts at the point-of-sale. Upgrade your kitchen with high-performance equipment that also saves you money on your energy bills!

How to Get Your Rebate

- 1. Visit a Participating Dealer.** See the back of this pamphlet for a list of participating dealers.
- 2. Pick Equipment:** A participating dealer can help you choose the right rebate-qualifying equipment to fit your needs. For a full list of eligible equipment, visit energystar.gov/productfinder.
Look for this sticker on qualifying foodservice equipment! »
- 3. Purchase Equipment:** Provide your installation address and DTE Account Information to verify program eligibility. Upon verification, the rebate will be applied at the point-of-sale as a discount on your sales invoice!

Earn Lifetime Savings with High-Efficiency Equipment

High-efficiency equipment uses less natural gas, electricity, and water, so you pay less on your utility bills.¹

	<p>High-Efficiency Gas Fryers Average annual cost savings: \$470 Payback Period (with rebate): 7 months</p>
	<p>High-Efficiency Gas Convection Ovens: Average annual cost savings: \$210 Payback Period (with rebate): 3.5 years</p>
	<p>High-Efficiency Gas Steamers Average annual cost savings: \$2,210 Payback Period (with rebate): 3 months</p>

Cooking appliances account for almost 35 percent of the average restaurant's energy expenditures²

Efficient equipment can decrease your energy use by as much as 75 percent³

¹ Lifetime savings costs calculations based on 365 days/year at 12 hours of usage per day (pre-rinse spray valve calcs based on 1 hour of usage per day), a gas rate of \$0.85/therm, and efficiency values from the Foodservice Technology Center. Percent savings represent the ratio of total lifetime cost of a standard-efficiency unit to that of a high-efficiency unit of equivalent size and capacity. Actual savings may vary. Calculations dated on 12/13/2018.

² Based on ENERGY STAR® study: <https://www.energystar.gov/ia/partners/publications/pubdocs/restaurant%20guide%20508%20-%20Dec%202009.pdf>.

³ Energy consumption savings based on comparison of annual gas consumption for high-efficiency and standard-efficiency units of equivalent size and capacity. Actual savings may vary. Calculations dated on 12/13/2018.

Qualifying Food Service Equipment

Many makes and models qualify for rebates. Eligible equipment must be installed at an active, valid, natural gas or electric DTE non-residential service location. For a full list of eligible equipment, select the corresponding equipment lists at energystar.gov/productfinder.
